Water in the American West: A Crisis in the Making

The American West is facing a water crisis. Climate change, population growth, and economic development are putting a strain on the region's water resources. In many parts of the West, water is already scarce, and the situation is only going to get worse in the years to come.

The consequences of water scarcity are dire. Water is essential for human life, and it is also essential for the economy. When water is scarce, it can lead to conflict, poverty, and even war. It can also damage the environment and threaten the health of our communities.

The Calgary Institute for the Humanities: A Leader in Water Research

The Calgary Institute for the Humanities (CIH) is a world-renowned center for research and scholarship on water. CIH brings together scholars from a variety of disciplines to study the complex challenges facing water management in the West. CIH's research is helping to develop innovative solutions to address the water crisis.

CIH's work is essential to the future of the American West. By understanding the challenges facing water management, we can develop the solutions we need to ensure that everyone has access to clean, affordable water.
